
Instructions For Using Reusable Bucket Trap

HOW TO USE: The Bucket Style Funnel Trap is a reusable insect trap for use with pheromone lures. It is available in all-green (*Item No. R03101*) or white, yellow and green (*Item No. R03401*)

Assemble trap as illustrated. Attach lure to the underside of trap top.

To kill captured insects:

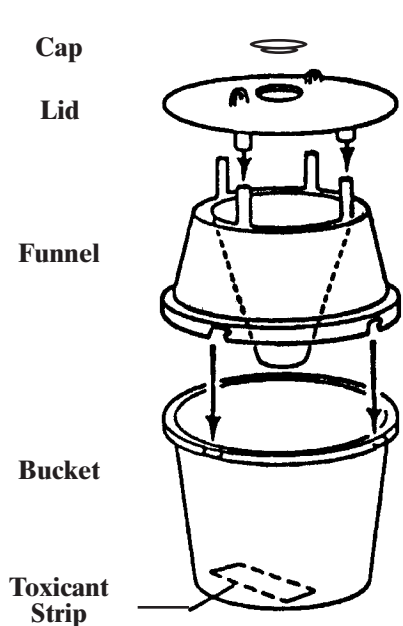

Drop an insecticide strip (*Item No. R17102*) into the bucket.

-or-

Seal off the drainage holes in the bottom of the bucket part of the trap and keep several inches of soapy water in the bucket.

-or-

Coat the underside of the lid and other interior portions of the trap with Tangle-Trap sticky coating, (*Item No. 95015*).

Join the bucket segment to the lid assembly by twist-locking the pieces together.

Attach a hanger wire or string to the trap lid and hang the trap from a tree branch, stake, or metal trap stand (*Item No. T9005*).

IMPORTANT NOTES FOR HANDLING ALL PHEROMONE TRAPS AND LURES:

When traps are used with pheromone lures, the lure odor can permanently contaminate the trap. Cross-contamination with more than one lure type may reduce or eliminate attractiveness. Do not use the same trap with a different lure type even in different years. Mark trap permanently with the lure type used, and always use the same lure type with that trap.

When handling lures, do not touch the lure or the insides of the lure package (or use disposable gloves), to avoid contaminating hands, tools, or traps used for other insects. Carry empty lure packages away from the moni-
(OVER)

toring site, and dispose of properly. Refrigerate or freeze lures for longest storage life. Lures stored for more than one season may not retain peak effectiveness.
